

“A rich provocative...project. At its best your work is truly original in its thinking and in the manifestation of that thought in form...when you allow your ideas to unfold ‘into’ form... your work really begins to show its potential for the profession”

**Patricia Patkau**  
Patkau Architects

“An exceptionally interesting building - filled with original thinking, from an original perspective...I see great potential in your work, a great facility of inclusion that is much needed in our time of minimalization.”

**Ron Walkey**  
Professor Emeritus UBC SOA

---

## profile

**Designer and Leader.** Adept at framing design within a big-picture world view and making connections between disparate disciplines. Background includes architectural design work and collaborative process facilitation, professional work as a mechanical engineer, and volunteer work as an environmental/social activist.

---

## skills

Demonstrated ability in **architecture and urban design.**

Thorough knowledge of current **green building** practice.

Extensive **computer skills** for design, analysis and the web.

Experience with **group organization and leadership** including participation in multi-stakeholder design processes and development of public events related to sustainable architecture and planning.

First-hand experience with **building and construction administration.**

Analytical **engineering skills** including energy modeling.

---

## work

**Designer / Principal** *rao-D cityworks* 2005–
